

Here Come the Trainees at Central Europe Mini!

Set in the early-1970s on what may well be the greatest Trainz Route ever, Central Europe Mini, this Super Session runs 12 passenger trains ranging from express to local and anything inbetween, as well as 4 different freight trains serving 14 different industries, transporting 7 different commodities. Additionally, 6 local shunting locomotives spring into action when needed. All run simultaneously, continuously, fully automated to the smallest possible detail.

Trains run from 06.00 till about 18.00. Feel free to quit before that, or to keep it running – traffic will resume at 06.00. (Should you want to change the session's clock, or its clock's speed, do so only after **all** trains have stopped for the night (should have happened before dark, so by about 18.30 or so), and before 05.59. At other moments, this is likely to screw things up, with even a small chance at Trainz actually crashing.)

Requirements

- TRS19 SP3 through TRS19 SP5, or TRS22 SP2. We advise you use TRS22 SP2, as that offers the best FPS/smoothest animation.

Note that starting with TRS22 SP3, the vendor crippled this route's signals, breaking any and every session, including this Super Session.

- The Route "Central Europe Mini", <kuid2:622685:103441:5>, available from the DLS. Make sure to get exactly that version. This session does **not** work with the newer versions of this route! (Content Manager may only show you newer versions. If so, to get the correct version, select the oldest one it does list, then tell it to "List Asset Versions" of that one. It should then open a new window that will show <kuid2:622685:103441:5>.)
- This version of Central Europe Mini in part relies on assets from Content Store routes, which you received for free when you bought TRS19. Thus, you will need to install "Sebino Lake", "ECML Edinburgh – Dundee", "Canadian Rocky Mountains – Golden BC", "Niddertalbahn TRS19", "Cornish Mainlines and Branches TRS19" and "Kickstarter County 2" from the Content Store.
- All other dependencies, both those of the route "Central Europe Mini", and

those of this session, are available on the DLS

- Disk space required for TRS19 is about 48GB, made up of:
 - ~39GB for the Content Store routes Central Europe Mini needs
 - ~50MB for the route
 - ~8GB for the route's DLS-dependencies
 - ~10MB for the session file
 - ~1GB for the session's DLS dependencies
- Disk space required for TRS22 is about 32GB

Installation

Make sure you understand our installation advice. You may also find it useful to read about how to run Super Sessions in general.

Regarding specific versions of Trainz

TRS19 SP3

Simply install the latest versions of all dependencies

TRS19 SP5 and TRS22 SP2

Install the latest versions of all dependencies, except for the following ones, of which you need to install specific, older versions:

```
<kuid2:61392:8111:78>,<kuid2:61392:8113:78>,  
<kuid2:61392:8114:78>,<kuid2:61392:8121:2>,  
<kuid2:61392:8130:87>,<kuid2:61392:8190:88>,  
<kuid2:61392:8200:85>,<kuid2:61392:8201:80>,  
<kuid2:61392:8202:80>,<kuid2:61392:8203:80>,  
<kuid2:61392:8204:80>,<kuid2:61392:8290:85>,  
<kuid2:61392:8311:80>,<kuid2:61392:8321:71>,  
<kuid2:76656:80015:1><kuid2:438004:60011:1>  
<kuid2:489332:36499:1>
```

TRS22 SP2

Additionally, install this older version: <kuid2:61392:4050:67>

Make absolutely sure that you have neither newer nor older versions of these assets installed! (When you install a specific version of an asset, Content Manager may **also** download other versions of that asset, which you **will** need to delete afterwards, or the session may not work.)

Download

Current versions:

- Version 2.0.1 for TRS22: Here Come the Trainzes at Central Europe Mini for TRS22, <kuid:952486:100134>. (If the .cdp file's sha256 is not 48a607be2d17e53ec5ce6b488205be03bd1fb35ef9224c52924b184468b78cbc you've gotten some imposter's version.)
- Version 2.0 for TRS19: Here Come the Trainzes at Central Europe Mini for TRS19, <kuid:952486:101179>. (If the .cdp file's sha256 is not 71cfd4b1a9e283c0633f3904043bd02d2ad8fef1041e58539e28e9457cc99f58 you've gotten some imposter's version.)

Version History

- 2.0.1 (2025-01-18)
 - Fix: workaround for TRS22 not showing AI trains' speeds
- 2.0 (2025-01-18)
 - First public release

- 2.0b3 (2024-09-17)
 - private beta
 - first version to work in TRS22
 - fix: rebuilt all Slovak eIT in TRS22, resulting in separate builds for TRS19 and TRS22
- 2.0b2 (2024-09-03)
 - private beta
 - several little tweakzes and fixzes
- 2.0b1 (2024-08-20)
 - private beta
- 2.0 (2022 – 2024)
 - complete rewrite; no longer relying on Trainz' AI
- 1.0 (2021 – 2022)
 - Initial build
